Dear Mr. Speaker,

We commend your recent statement on Ukraine and Putin's would-be actions if the Ukrainians do not stop him.

Also, we resolutely oppose any privileged Motion to Vacate on the House floor and agree you should not cave to irrational and destructive calls for you to resign.

Further, we urge you to work to make such a motion moot by either effectively turning it off or raising the threshold so high we never hear about it again.

Sincerely,

Daniel Perrin
